## CANYONEERING, ROCKANEERING, & CLIMBING

### Chamisa Canyon

Half day 4-5 hrs. | 1-6 ppl

Named for the shrub (also called Rabbitbrush) that inhabits this area, Chamisa Canyon is a trip that packs a lot of punch! Often full of water, this tight canyon is a fantastic mix of rappels, wading, swimming and beautiful scenery all await you! If you choose this trip, come prepared to get wet and have a lot of fun.

### Ephedra's Grotto

Half day 4-5 hrs. | 1-6 ppl

Perfect for adventurous beginners Ephedra's Grotto begins with a short hike across ancient petrified sand dunes. Quickly you find a dry waterfall that seems to almost disappear into the tightest, deepest rain gutter imaginable. "We go down there?!" is the usual question after peering over the edge, and indeed we do. This exquisite rappel is the first obstacle in reaching the entrance to the amazing grotto. Now in a small stone room, whose floor rarely sees the light of day, we exit to find a jaw-dropping rappel into an alluring green canyon below. Adjacent to the rappel is an enormous natural stone bridge — the 6th largest natural land bridge in the world! A cool spring-fed stream accompanies us for the rest of this outstanding hike, exiting into the Colorado River corridor.

### Hypathia Canyon

5-7 hrs. | 1-6 ppl

Requiring more stamina than our half day trips, this tour is suitable for people of all experience levels who are physically fit and will enjoy the exertion of scrambling, climbing, and hiking as well as the rope work of canyoneering. Tucked within a sweeping lunar landscape of rock dunes and fins are several quiet and rarely visited canyons. Dinosaur tracks, a sweeping secluded arch, and a multitude of shady canyon obstacles, including a short wade through potholes, mark the passage with three opportunities to rappel. Groups preferring to ease into the experience of rappelling can bypass the first rappel, a stunning 130ft drop beside Teardrop Arch, and begin with the second rappel, a 50ft descent into an impressive rock amphitheater that ushers you into the last challenge: an exposed 100ft rappel. A short hike back to the trip's starting point closes this fantastic desert loop!

Offering a casual approach that will build confidence in beginning climbers and their parents, your guide will set the pace and tone of the trip so that the parents can relinquish some of their responsibilities and enjoy the activity. Then, your guide will give the kids some of the responsibility for team safety and hold them accountable for the safety of themselves and the other members. All of the participants are charged with reaching a common goal, and have equal say in how the goal is reached. Parents might be surprised to see the kids step up to the challenge and become pro-active about being safe and supportive of the group.

This proposed Wild and Scenic River section is totally isolated from modern civilization: a canyon of serene solitude surrounded by red sandstone spires. The river cascades through the ever-deepening sandstone monuments and into the narrow Black Granite Gorge. Here the river meets opposition from the canyon walls, creating the fast and furious rapids that give Westwater Canyon its reputation: Funnel Falls, Last Chance, the Steps, and, of course, the infamous Skull Rapid. This trip is designed for adventure seekers and canyon lovers, for those looking for great rapids on a remote section of river. The small number of people allowed in this canyon each day is strictly controlled. That means you will encounter very few people on the river during your trip. There will be chance to swim and enjoy the river as you float out of Westwater Canyon.
